

Protecting your

✦ AI-Powered DLP

Prevent Risky & Sensitive File Uploads

DopamineDLP delivers endpoint data loss prevention built directly into dope.security's Fly-Direct SWG. It watches for file uploads and AI prompts, extracts text, and classifies in the dope.cloud via zero retention OpenAI APIs. By leveraging LLMs, reduce false positives and surface what matters with extreme precision while remaining AI data compliant—no data retention, and no training on your data.

AI-Powered DLP

Lock Down Already Exposed Files

CASB Neural delivers AI-powered DLP for data at rest in your cloud drives. It automatically scans and discovers publicly or externally shared files with continuous monitoring for sharing changes. Using large language models, it understands file content to identify IP, PII, PCI, and PHI, cutting false positives versus regex rules. You get continuous visibility and fast, one-click remediation.
