POND

BossCover Pond Liner

BossCover Pond pond liner is a strong, large EPDM membrane that remains elastic throughout its entire service life and is completely resistant to UV and ozone. In addition, extreme temperature shocks are no problem at all.

BossCover Pond EPDM pond liner is a fully vulcanized waterproofing membrane made from ethylene propylene diene terpolymer rubber. Because BossCover pond liner is extremely strong, it also offers good resistance to root growth, acid rain, and other biological influences. Furthermore, the membrane does not contain any

plasticizers, so no hazardous gases are emitted during waste processing. The membrane has a very long service life and is fully recyclable. These properties make the product extremely durable and environmentally friendly.

Depending on the dimensions of the membrane, the surface of the waterproofing can be seamless. In other situations, seams can be created using self-adhesive tapes.

Dimensions

The complete range of thicknesses, widths, and lengths. Other dimensions available on request.

| Thickness (mm) | Length (m) | Width (m) |
|----------------|------------|--|
| 1.0 | 30.48 | 3.05 - 4.58 - 5.08 - 6.10 - 7.62 - 9.15 - 12.20 |
| 1.1 | 30.48 | 3.05 - 3.66 - 3.96 - 4.58 - 5.08 - 6.10 - 9.15 - 12.20 |
| 1.5 | 30.48 | 3.05 - 4.58 - 5.08 - 6.10 - 9.15 - 12.20 |

Placement

STEP 1

Unfold the BossCover Pond EPDM pond liner. This liner is root-resistant and can be spread out as it is. When the surface contains sharp objects, it is advisable to first lay down a protective polyester underlay.

STEP 2

Apply ballast to the edge (min. 50 cm). BossCover Pond EPDM pond liner can be laid seamlessly up to 370 m².

A seam connection between two pieces of pond liner or details such as a drain for a fountain can be finished quickly and easily with our special user-friendly tapes and adhesives.

STEP 3

Finish to your own taste.
And above all: enjoy your pond!

THE COMPLETE RANGE FOR YOUR WATERPROOF PROJECT

ROOF

EPDM membranes, all adhesives and primers, drains, roof penetrations, roof edges, mounting anchors, lead substitutes, and much more.

FACADE & FOOTING

EPDM strips, primers and kits, inside and outside corners.

GREEN ROOF

Sedum trays, gravel, drainage mats and films.

POND

EPDM pond liner, all suitable adhesives and primers.
