**FASTBUDGET**

---

**Case: 60209 Remove the Fiscal Year/Chart Opening page**

We've removed the requirement to select a Chart and Fiscal Year when entering the application, and have instead moved this to page level filters. This will allow for better use of Pinned Reports, Dashboards, and other baseline functionality.

Standard sticky filter functionality is available in the application. Once you select values for the Chart and Fiscal Year in your session, those selections will carry over to other pages - so you won't need to re-enter them each time.

5.1.04 requirements:

- A clone of FASTPROD to FASTTEST and BannerProd to BannerTest needs to be done within a month prior to Millennium upgrading your TEST environment.
- Extensive testing of the Budget application will be necessary due to the scope and magnitude of the changes that have been made. Plan for at least one month between upgrading the FASTTEST environment and upgrading the FASTPROD environment. Millennium will require 1-2 weeks for updating any existing customizations and extensive testing of the application (depending on the scope of your customizations) prior to releasing the upgraded TEST environment to your staff responsible for upgrade testing. Full testing of all Budget processes should be conducted by your Budget team prior to FASTPROD being upgraded.

**Case: 60680 Budget Benefit Rounding Options**

Prior to this release, benefits were rounded either to the nearest whole number or penny, based on configuration setting 125. With the introduction of configuration setting 127, you can choose to round the total benefits to the nearest cent, dollar, ten dollars, or hundred dollars.

**Case: 61375 Forecast - Summary by Account Detail: Add column for 'This Year Actuals'**

Added an optional field 'This Year Actuals' (which can be enabled if desired) to the Forecast - Summary by Account Detail report.

**Case: 61537 Posn posting**

When posting positions to PBUD appointment percentage, budget basis, annual basis, and base units must either all be set to 0 or all set to non-zero values.

**Case: 62230 Unable to update Spreading Maintenance**

Fixed issue preventing updating of Spreading setup values if Periods 13 and 14 were not visible.

---

### **Global Changes That Affect All Applications**

---

#### **Case: 61491 Report Scheduler blocks other threads under certain conditions**

When a private Pinned Report was scheduled for delivery and that user lost access to the report (or completely disappeared from the system) then the schedule would be marked as in progress but the job wouldn't actually start since it had nothing to do. This means it would never succeed or fail until it timed out, preventing other scheduled events from triggering during that time.

#### **Case: 61736 Convert CR/LF characters into <br /> when sending Report Scheduler emails**

When the server sends emails in HTML format, if the user enters line breaks (carriage return/line feed characters) they will now be replaced with HTML <br /> tags so that the recipient will see the line breaks as new lines instead of just single spaces.

#### **SYS. REQ. Minimum Server Requirements**

DATABASE: Oracle 19c      WEBSERVER: Windows Server 2019, IIS 10, .NET Framework 4.7.2
