### **FASTHR**

---

#### **Case: 60961 Employee Details: Add Dist Orgn field to Employee Info section**

Distribution Orgn Code column has been added to Employee Info section of the Employee Details report.

#### **Case: 61937 Make Fiscal Year Balance indicator available on Employee Leave Details**

A Yes / No column has been added to the Leave History Details report. This column will indicate if the record represents the last record in the fiscal year for the related employee and leave type.

#### **Case: 62141 Update logic for SYNJOBEARNINGS warehouse table**

The data refresh now looks at all records in the job earnings table to determine if a record has been replaced by a more current record and uses that as the end date for the previous record.

#### **Case: 62334 Employee Mail List Report: Add columns**

Home Orgn Code and Description columns have been added to the Employee Mail List report. You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

#### **Case: 62485 Payroll Deduction Detail: New Columns**

The following columns have been added to the Payroll Deduction Detail report (de-selected by default):

- Seq Adjusted
- Disposition
- Event Date
- Gross Pay
- Net Pay

You can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report. Additional information regarding the data contained in these columns can be found in the "Tooltips" column of the Data Grid Columns section of the Administration tab, or by hovering over the column title within the report.

---

### **Global Changes That Affect All Applications**

---

#### **Case: 61491 Report Scheduler blocks other threads under certain conditions**

When a private Pinned Report was scheduled for delivery and that user lost access to the report (or completely disappeared from the system) then the schedule would be marked as in progress but the job wouldn't actually start since it had nothing to do. This means it would never succeed or fail until it timed out, preventing other scheduled events from triggering during that time.

#### **Case: 61736 Convert CR/LF characters into <br /> when sending Report Scheduler emails**

When the server sends emails in HTML format, if the user enters line breaks (carriage return/line feed characters) they will now be replaced with HTML <br /> tags so that the recipient will see the line breaks as new lines instead of just single spaces.

#### **SYS. REQ. Minimum Server Requirements**
