
Global Changes That Affect All Applications

Case: 61491 Report Scheduler blocks other threads under certain conditions

When a private Pinned Report was scheduled for delivery and that user lost access to the report (or completely disappeared from the system) then the schedule would be marked as in progress but the job wouldn't actually start since it had nothing to do. This means it would never succeed or fail until it timed out, preventing other scheduled events from triggering during that time.

**Case: 61736 Convert CR/LF characters into
 when sending Report Scheduler emails**

When the server sends emails in HTML format, if the user enters line breaks (carriage return/line feed characters) they will now be replaced with HTML
 tags so that the recipient will see the line breaks as new lines instead of just single spaces.

SYS. REQ. Minimum Server Requirements
