Case: 59970 Config setting to hide Revenue Less Expense grand total when not necessary

Created configuration setting #19 "Suppress additional Rev Less Exp total lines on Summary reports by Acct when not relevant? (Y/N)" with default value of Y. This controls whether the Revenue Less Expense grand total line appears on the Summary by Hierarchy (by Acct) or Summary by Acct Detail reports when the report is filtered to not include a mixture of accounts or account types. i.e. if the report is filtered for only revenues, or only expenses, there is no need to show the revenue less expense calculation.

Case: 62201 Update Vendor search on Vendor PO Summary Report

Improved the quality of search results returned by the Vendor filter control on the Vendor PO Summary report.

Global Changes That Affect All Applications

Case: 62332 Excel export when exporting Concatenate Group Function is applied to a Date field

Fixed a bug when exporting report results to Excel if the Concatenate group function was used (via the Advanced Options tab) on a column that is a date type.

Case: 62706 Drag/Drop not working on Dashboard Filters

Fixed an issue when editing a dashboard where dragging and dropping filters would not work.

Case: 62743 Some elements show through the Add Dashboard Filter dialog

Fixed a layering display issue with the Add Dashboard Filter dialog.

Case: 62754 Communication Center "test" button does not work properly

Fixed a bug with the "test" button in Communication Center.
