
FASTAR

Case: 65579 Sponsored Student posting - add new config setting

Added new configuration setting #142 "SRCE_CODE used when uploading tuition credits" for when posting Sponsored Student invoices and configuration setting #140 "Upload tuition credits to Banner for Sponsored Student invoices (Y/N)?" is set to "Y"

FASTBUDGET

Case: 65433 Budget Navigation Issues - Budget Transfer Detail to Development Budget Summ by Hierarchy

Various navigational and other bug fixes related to Chart/Fiscal Year changes made in version 5.1.04. These fixes were also back ported and patched into v5.2.01, v5.2.02 and v5.2.03.

FASTFINAID

Case: 64943 Updated Logic for SAP Codes

Fixed SAP Codes data for "Student Financial Aid Awards by Period" report to check for the student's latest or last accessed SAP Code Status

FASTHR

Case: 64452 Added Gender Desc to Employee Info

Added a GENDER_DESC field to the EmployeeInfo warehouse table.

Case: 65021 Position Budget Details Report: added new column for ACCI Index code

The ACCI Code column has been added in 'Deselected' mode to the Position Budget Details report. Administrators can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Additional information regarding the data contained in this column can be found in the "Tooltips" column of the Data Grid Columns section of the Administration tab, or by hovering over the column title within the report.

FASTSTUDENT

Case: 63277 Convocation Degree Records: Added columns for Campus Description 2 and Level Description

The following columns have been added in 'Deselected' mode. Administrators can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Additional information regarding the data contained in these columns can be found in the "Tooltips" column of the Data Grid Columns section of the Administration tab, or by hovering over the column title within the report.

New columns: Campus_Desc_2 and Level_Desc

Case: 64712 Student Aged AR: Added Birth Date Column

The Birth Date column has been added in 'Hidden' mode to the Student Aged AR report. Administrators can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Additional information regarding the data contained in these columns can be found in the "Tooltips" column of the Data Grid Columns section of the Administration tab, or by hovering over the column title within the report.

Case: 64762 Course Section Data Fix

Fixed the Course Department, Course Division and Course College data when reporting at the course level to look first at the section override values

Case: 65000 Class Lists: Added SECTION NUMBER

Added Section Number to the Class Lists report under Student Reporting → Course Info. You can control whether new columns and/or filters are added or enabled via the Administration tab of the report

Case: 65022 General Info: Added new columns

The following columns have been added in 'Deselected' mode. Administrators can adjust whether new columns and/or filters are added/enabled via the Administration tab of the report.

Additional information regarding the data contained in these columns can be found in the "Tooltips" column of the Data Grid Columns section of the Administration tab, or by hovering over the column title within the report.

New columns: Degree Code 2 and Degree Desc 2

Case: 65024 General Student Info & Student AR List reports: Custom Data Entry fields

15 custom fields have been added to both reports to allow end users to record important information about student/term. They are delivered in hidden mode. The columns can be renamed to whatever you want and dropdown validation lists changed per client request.

Global Changes That Affect All Applications

Case: 65458 Page Setup: New Informational Columns

Added 3 new columns, in the Page Options section of all reports: Page Hints, Primary Banner Tables and Primary FAST WH Tables, as well as added functionality to the Page Description field.

Page Description has the ability to add text and stretch out/scroll through the window to see all the information. This information is available to front end users under the dropdown arrow of the application trail (the colored bar across the top of the report).

Page Hints, if populated, will provide hints on running the report; administrators can also add their own hints here if needed. This information is also available to front end users under the dropdown arrow of the application trail.

Primary Banner Tables and Primary FAST WH Tables will provide users with insight as to the Banner tables and FAST Tables being used for the report.

Please note that all these columns will be updated and/or populated over the next few releases.

Case: 65488 Field Search: Add more columns with info about Report

Added 3 new columns, in the Field Search report, throughout FAST applications: Page Hints, Primary Banner Tables and Primary FAST WH Tables. These columns have been added in 'Deselected' mode. Administrators can adjust whether new columns are added/enabled via the Administration tab of the report.

Page Hints, if populated, will provide hints on running the report.

Primary Banner Tables and Primary FAST WH Tables will provide users with insight as to the Banner tables and FAST Tables being used for the report.

Please note that all these columns will be updated and/or populated over the next few releases.
