
FASTBUDGET

Case: 64356 Prevent BT from submitting without attachment

Added a new configuration setting #401 - Allow Budget Transfer submit for approval when no documents? (Y/N)

The default value is Y, mimicking historic behavior. If this setting is changed to N, then validation will occur when submitting a Budget Transfer for approval that will prevent the submission if there are no supporting documents attached.

Case: 65832 Dashboard Filters are repeating

Fixed a problem when drilling down to a report from a Dashboard that had a filter applied, the filter value would then display twice in the filter trail. For example "Fund = 1234 General Operating" would say "Fund = 1234 General Operating General Operating"

Global Changes That Affect All Applications

Case: 63547 Banner SaaS to FAST integration

Updates to support Banner SaaS. Certain places across the system where we previously had live calls to Banner have now been changed to reference the Portal data warehouse (which typically runs every hour, compared to reporting applications which only run once overnight).

Case: 65961 Notifications when Hung Job is detected

For clients hosted in the Millennium Cloud: Added the ability to send email notifications to the appropriate personnel (defined in configuration setting #700 under each application) when a refresh job is detected as stuck/hung and is terminated.

Case: 66187 Query Builder - Fails when decimals past 28 precision exist

Fixed a problem when a column returned by a query was a repeating decimal (ex. $1/3 = 0.33333333333333333333333333333333$) with more than 28 digits of precision. The system will now automatically truncate the value down to 28 digits, preventing an error message, and preventing the user from needing to manually round or truncate it themselves.

SYS. REQ. Minimum Server Requirements

DATABASE: Oracle 19c WEBSERVER: Windows Server 2019, IIS 10, .NET Framework 4.7.2
