Work experience

Pratt Institute

August 2025 - Current

Graduate Assistant

New York, NY

- Updating The Amplification Project's website design and fixing defects using Webflow
- Creating a design system on Figma to enhance design and brand consistency

JPMorgan Chase

February 2024 - July 2025

Software Engineer II

New York, NY

- Collaborated closely with design, product, and data teams to design and build out alpha and beta versions of pilot web application using React, Spring Boot, and Amazon Web Services (ECS, RDS, Route53)
- Led migration of content from local code to CDN using GraphQL, resulting in consistent and correct content as a result of increased collaboration with content editor and content producer
- Implemented integration, end-to-end, component, performance, and contract testing on frontend and backend using tools such as Pactflow, JMeter, Jest, and Selenium

JPMorgan Chase

July 2021 - February 2024

Software Engineer I

New York, NY

- Used in-house Javascript framework along with Spring Boot to develop full-stack web application that grew from a pilot program of about 100 users to a general audience of thousands
- Assisted in modernization by migrating application from in-house Javascript framework to React and from legacy data centers to new data centers
- Performed QA, accessibility, and automation testing using tools such as Cucumber, Selenium, VoiceOver, axe DevTools, and Xcode

Education and certifications

Pratt Institute

August 2025 - Current

M.S. in Information Experience Design

AWS Certified Cloud Practitioner

October 2023

Thinkful UX Design Certificate

March 2022 - November 2022
