

TREADMILL RUN TX

The Treadmill RUN TX brings professional-level performance into a more space-efficient design, delivering the same core power as its counterpart in a slightly reduced footprint. Driven by a 3HP continuous / 7HP peak motor, it supports speeds up to 20 km/h, with 15 levels of motorized incline system making it equally capable of supporting steady-state cardio and more demanding interval-based sessions. The LED display keeps all critical workout data visible at a glance, while the physical button and keypad controls ensure responsive, intuitive operation.
