## Advice from C. G. Jung to Robert A Johnson

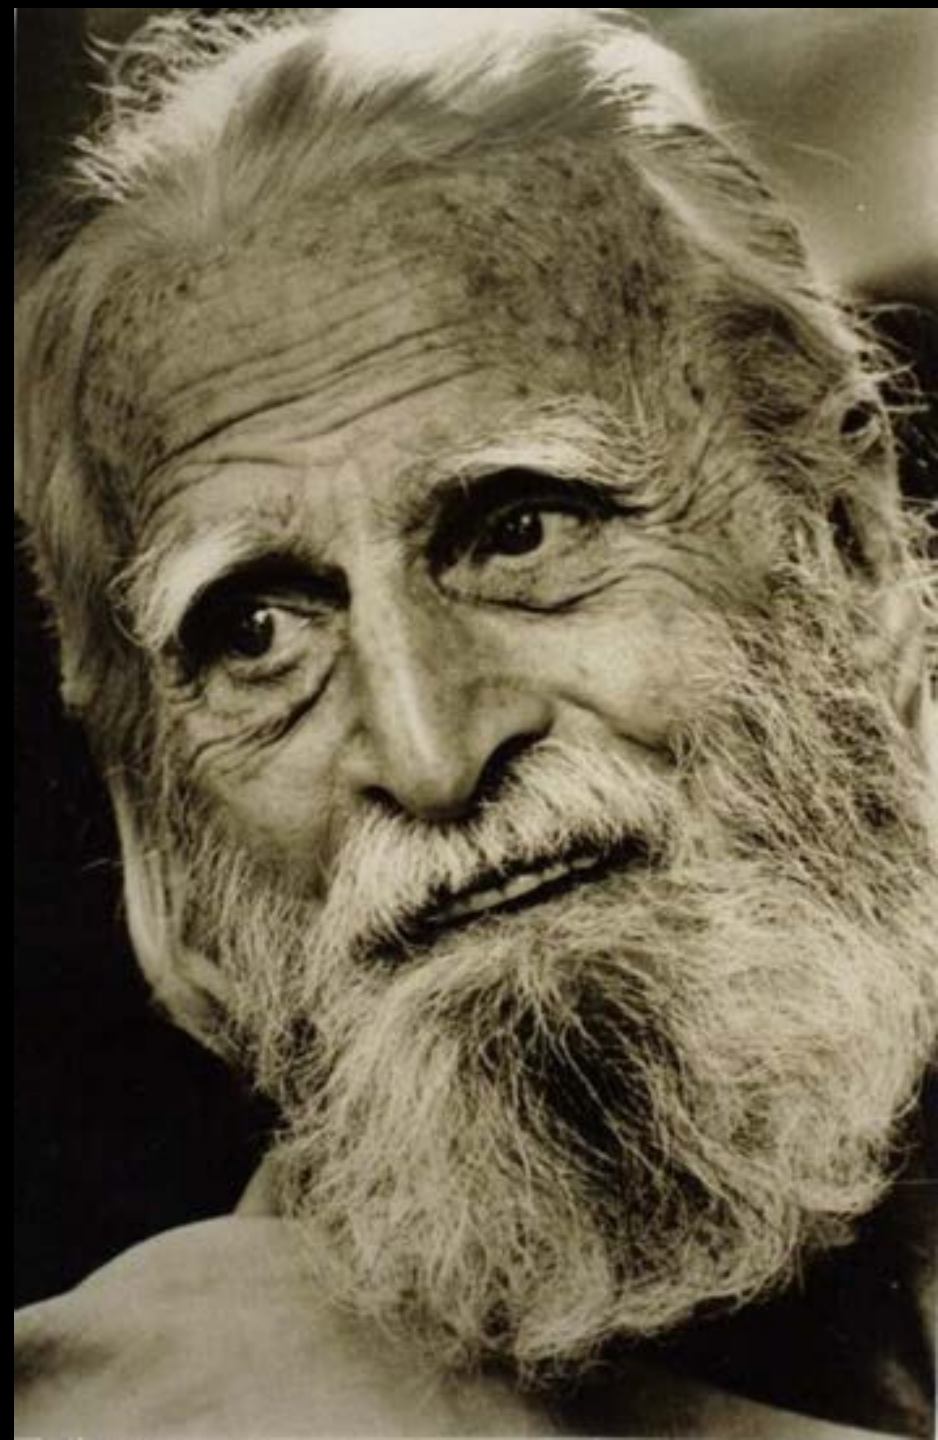

- Spend most of your time alone.
- Have a separate room to be used for nothing but Inner Work.
- Never join any organization.

Dr Jung told me the unconscious would protect me, give me everything I needed for my life and that my one duty was to do my inner work. All else would follow from this. He said it was not in the least important whether I accomplished anything outwardly in this life since my one task was to contribute to the evolution of the collective unconscious.
