

The Simple Way to Grow and Manage Your Membership

Built for clubs, associations, nonprofits and communities.
Join It replaces spreadsheets, manual renewals and disconnected tools with one simple membership system.

Why organizations switch

Less admin, more mission

Automated renewals, payments and reminders take repetitive, manual work off volunteers and staff, so time goes to members, not spreadsheets.

Members who stay

Simple online sign-up, self-service profiles and automatic renewal reminders make it easier to join and easier to stay.

Continuity you can count on

One central, secure member database that does not live in one volunteer's head, and can be handed over easily when roles change.

What changes

Today

- ✗ Renewals chased by hand, members slip through
- ✗ Payments scattered across cheques, cash and PayPal
- ✗ Member records in spreadsheets only one person understands
- ✗ No clear picture of membership or income
- ✗ Member data in spreadsheets on personal computers, with no password control, no backups

With Join It

- ✓ Renewals and reminders run automatically
- ✓ Online card payments through Stripe, with offline payments recorded in the same place
- ✓ One shared system any admin can pick up
- ✓ Clear reporting on members, renewals and revenue
- ✓ One encrypted system with controlled access, two-factor sign-in and automatic backups

Transparent pricing

Three plans (Starter, Total, Extra), priced by tier rather than bundling everything into one price, so you pay for what your team will actually use.

Prices start at \$29 per month for the Starter package plus service fee. Annual billing saves 10%, and nonprofits save a further 10% on top.

For most organizations the payback is quick: automated reminders recover renewals that would otherwise quietly lapse, and easier sign-up brings in new members, so retained and new dues typically offset the cost of the platform.

What switching involves

Switching systems is the part people worry about most, and for good reason: your member records are among your organization's most valuable assets, and nobody wants renewals or payments interrupted while systems change over.

Our support team helps with data import and setup at every step, and the Extra plan includes a dedicated account manager to guide onboarding directly. Most organizations migrate their core data in a day or two.

Questions boards usually ask

Are we tied into a long contract?

We provide flexible monthly or annual plans, you're not locked into a long contract and can easily cancel at the end of your term.

What support do we get?

Real people at every step: our top-rated support team handles data import and setup during the switch, and stays on hand once you are live.

Is our member's data secure?

Yes. Records are encrypted with role-based access, so you control who sees what and can revoke it when someone leaves. Card details are handled by Stripe and never stored on Join It's servers, and Join It complies with GDPR.

Questions before you decide?

We're happy to help. Email us directly, and if it's useful, we'll join your next board or committee meeting to answer questions directly.
