

Security Gap Assessment

Pinpoint gaps in your current security posture and get a clear, strategic roadmap to improve.

What is it?

This workshop offers a deep dive into your current security posture, benchmarking your controls against the CISv8 framework. You'll walk away with a strategic plan to strengthen defences and align to best practices.

Why we offer this workshop

Many organisations lack visibility into their true risk exposure. We offer this workshop to help you build a clear roadmap for investment, compliance, and control improvement.

Key outcomes

- Full assessment against CIS Critical Controls.
- Expert-led review of policies and controls.
- Prioritised three-year improvement roadmap.
- Guidance aligned to PCI DSS and ISO 27001.
- Improved clarity for budgeting and planning.

What to expect

Initial scoping session to define goals

In-depth assessment of current controls

Gap analysis aligned to CISv8

Compliance check (PCI, ISO, etc.)

Delivery of roadmap with prioritised actions
