

Licence Mapping Workshop

Understand what you've got, what you need, and how to optimise it

What is it?

This workshop gives you a structured view of your current software licencing and usage across Microsoft and other key vendors. It's designed to help you uncover optimisation opportunities, eliminate unnecessary spend and ensure you're getting the most value from your software investments.

Why we offer this workshop

Software licencing is often complex, costly and misaligned with actual business needs. We offer this workshop to help organisations regain visibility and build a smarter, more strategic approach to managing their software estate.

Key outcomes

- Identify overspend and duplication across licences.
- Improve compliance and audit readiness.
- Build a roadmap aligned to business growth.
- Clarify current vs required licence positions.
- Leverage licencing entitlements you already own.

What to expect

Kick-off session to understand environment & strategy

Review current usage, entitlements and deployment reports

Identify gaps, risks and optimisation opportunities

Review findings and build a future-ready licencing roadmap

Optional support with renewals, SAM, FinOps or deployment
