

Modernise Endpoints

Secure, manage and optimise your devices

What is it?

Our Modernise Endpoints Workshop reviews your current device estate and management tools, helping you transition to a modern, secure, and scalable endpoint strategy using Microsoft Intune, Autopilot and Windows 11.

Why we offer this workshop

Managing endpoints is more complex than ever, especially with remote and hybrid teams. This workshop helps you reduce complexity, improve security, and create a consistent experience across your entire device environment.

Key outcomes

- Full endpoint estate assessment.
- A modern management strategy.
- Security and compliance alignment.
- Cloud provisioning (Autopilot, Intune, Windows 365).
- Roadmap for rollout and optimisation.

What to expect

Discovery session & inventory review

Endpoint analytics & performance assessment

Security and Zero Trust alignment

Modern management tool recommendations

Implementation plan and roadmap
