

Copilot Value & Adoption

Get ready for AI-powered productivity

What is it?

Our Copilot Value & Adoption Workshop helps you assess your organisation's readiness to adopt Microsoft Copilot. We explore real use cases, align the technology to your goals, and build a practical roadmap for secure, scalable adoption.

Why we offer this workshop

Microsoft Copilot has the power to transform how your people work, but only if it's rolled out with the right structure, support, and security. This workshop helps you unlock the full potential of Copilot by identifying where it fits, how to manage change, and how to deliver meaningful value.

Key outcomes

- Defined Copilot use cases aligned to business goals.
- Readiness across data, licensing and security.
- Change management and user adoption plan.
- Champion and pilot programme design
- Roadmap for secure, staged implementation.

What to expect

Kick-off & stakeholder alignment

AI use-case exploration

Security, privacy & data review

Change management strategy
