

AI Readiness Check

Know your true AI readiness – and what it will take to achieve real, scalable value.

Motivation

Organizations acknowledge the significant potential of artificial intelligence, yet many encounter challenges in assessing their true readiness for scalable, value-driven, and responsible AI adoption.

Disconnected initiatives, ambiguous responsibilities, underdeveloped data and technology infrastructures, and skill gaps frequently result in stalled pilot projects rather than achieving lasting impact.

Our AI Readiness Assessment offers a structured, streamlined, and objective approach designed to illuminate critical organizational factors essential for successful AI implementation. It provides a transparent overview across key dimensions and establishes a solid foundation prior to embarking on an AI strategy and roadmap.

Serving as both a diagnostic and actionable self-assessment tool, it empowers organizations to accurately identify their current position and determine the necessary actions to effectively transition from ambition to execution.

What we bring

Forvis Mazars, Bolzhauser, and PRODYNA combine complementary strengths across organization, governance, and technology to create a holistic and execution-ready foundation for sustainable AI adoption.

- Translate business ambition into a clear, executable AI strategy and operating model
- Establish robust governance, procedures, and decision frameworks for responsible AI
- Design scalable data foundations, platforms, and architectures to support long-term AI success
- Align structures, roles, and skills to enable organization-wide AI adoption
- Integrate AI pragmatically into existing processes and enterprise environments

What you need

To ensure an efficient and meaningful assessment, we ask your organization to:

- Involve key stakeholders from business, IT, data and daily users by having them complete the self-assessment.
- Provide honest and clear feedback on current skills and processes.
- Ensure management is informed and ready to discuss outcomes and potential impacts during a brief review meeting.

Benefits

- **Clarity first:**
Understand your AI readiness before major investments.
- **Structured assessment:**
Evaluate readiness with a proven framework.
- **Quick start:**
Low effort, high value.
- **Practical results:**
Get specific recommendations for your level.

Quick facts

- **Format:**
Structured self-assessment + expert analysis
- **Outcome:**
Readiness assessment, recommendations, and activation guidance
- **Recommended next step:**
AI Strategy & Roadmap engagement

What you get

We enable your organization to understand its current AI readiness and define clear, pragmatic next steps.

Our deliverables include:

- **AI Readiness Profile:** A structured maturity view across four core dimensions: Technology, Process, Culture, Skills.
- **Strengths & Gap-Analysis:** An aggregated assessment summarizing key strengths, gaps, and overall readiness level.
- **Recommendations & Strategic Positioning:** Actionable guidance and strategic considerations tailored to your starting point – scalable depending on your needs and project context.
- **Readout Session:** All results are discussed in a structured session to ensure shared understanding and alignment.

The AI Readiness Assessment follows a lean and proven structure:

PHASE	ACTIONS
Kick-off Meeting	Brief onboarding session to define participant groups and introduce the assessment platform.
Self-Assessment Execution	Participants complete a structured questionnaire covering the four AI readiness dimensions: <ul style="list-style-type: none">• Technology: Infrastructure, data access, tooling, and AI platform readiness• Process: Development, deployment, lifecycle, and operational processes for AI• Culture: Mindset, leadership support, experimentation, and acceptance of AI• Skills: Availability of AI, data, and business capabilities
Consolidation & Analysis	We consolidate responses, analyse readiness levels, and identify systemic patterns, strengths, and bottlenecks.
Readout & Activation	We share the results in a focused session (90-120mins), held approximately one week after the survey closes, and outline potential next steps tailored to your context.

Note: This is our standard methodology. We are happy to modify and adapt to the specific needs of your organization.

About Us

Forvis Mazars is an international professional services firm delivering audit, tax, advisory, and organizational consulting services to enterprises worldwide. Bolzhauser is a consulting firm focused on process optimization and digital transformation, bringing deep experience in complex organizational environments. PRODYNA is a European IT consultancy specializing in enterprise software, data platforms, and cloud-native architectures.
