THE CONCEPT

01

GEOPOLITICS

Discover how trade, energy, capital and tech sovereignty are being redrawn.

You'll learn where Europe is heading, discover how China will evolve and how that will impact your business.

02

TECHNOLOGY

The future is superintelligence and physical AI.

What compounds, what collapses, and how AI and robotics reshape your people, your processes and your platforms.

03

HUMANS

When intelligence is free, empathy is the scarce asset.

How expectations, leadership and the future generations will shift. Learn what people will want from work and from your brand.

*“This is a **one-day deep dive** into the three things that'll actually shape your business by 2040: geopolitics, technology, and humans. **Seven experts**, one day, no fluff. Why now? Because the **decisions you make this year** will **shape the future of your organization**. You will walk away with a **clear vision** and the ideas on what to future-proof your business.”*
