

CONCERTINA SINGLE RAZOR WIRE - CBT 60

The product

Concertina (razor blade barbed wire) is a high-security product designed to protect sensitive sites, industrial premises, car dealerships and certain residential areas.

Presented as a grid, it provides effective defence against burglary and vandalism. It's made from steel strips punched to form sharp barbs around a high-strength central steel wire, capable of resisting cutting by ordinary tools.

The arrangement of the blades makes this product a highly effective deterrent along its entire length.

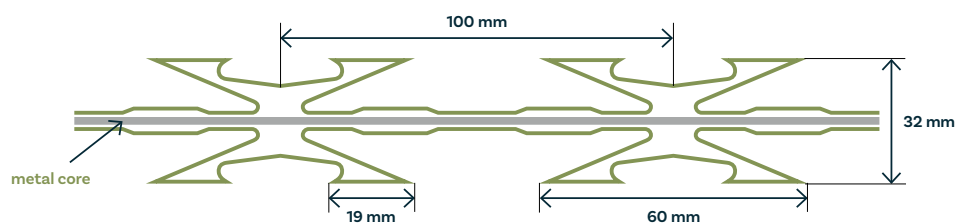

CBT 60 concertina is also known as Harpoon, Harpon and Detainer.

Characteristics

- Wire diameter : 2,5 mm
- Blade length : 60 mm
- Blade width : 21 mm
- Blade center distance : 100 mm
- Finish : 270g heavy galvanised, 304 or 316L stainless steel
- Grid diameter 700 mm pre-stretch
- Blade thickness : 0,60 mm
- Coil number : 55
- Number of staples per coil : 3 to 5 depending on grid diameter
- Grid packaging : wrapped in concentric loops attached with staples
