

BAVOLETS

The product

Combined with barbed wire or concertina wire, bavolets form an excellent protection system that enhance the security of a fence.

Attached to posts, they provide an additional defence system along the entire length of a fence.

Bavolets provide maximum dissuasion and protection for high-risk areas by limiting the possibility of climbing.

Characteristics

- Single (internal or external) or double bavolets
- Addition of barbed wire, concertina wire or another panel to be attached to the bavolets
- Diameter and dimension depending on post - upon request

Single bavolet
and barbed wire

Double bavolet
and barbed wire

Single bavolet and
rigid fence panel
