

HEAVY WALL SPIKES

The product

Wall spikes are a security system for industrial and sensitive sites. This type of obstacle consists of support bars topped with sharp spikes.

Generally attached to walls, fences, gates or roofs, wall spikes protect high-risk environments and prevent climbing.

Multiple types of wall spikes are available to suit the security needs of the site.

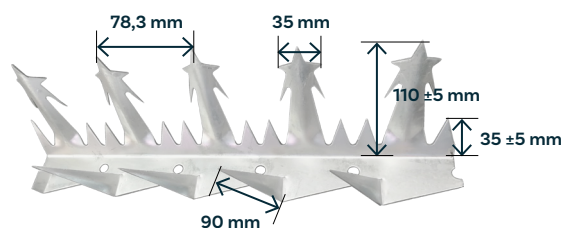

The Heavy model consists of 3 types of spikes : 2 straight spikes measuring 35 mm and 110 mm in height and 1 angled spike measuring 90 mm. The space between the tallest spikes is 78.3 mm.

Characteristics

- Support length : 1250 mm
- Support width : 50 mm
- Steel thickness : 2 mm
- Finish : galvanised
- Unit weight : 1,75 kg

FINISH	Galvanised
THICKNESS (mm)	2
SPIKE LENGTH (mm)	110
DISTANCE BETWEEN SPIKES (mm)	78,3
BASE WIDTH (mm)	50
TOTAL LENGTH (mm)	1250
UNIT WEIGHT (mm)	1,75
