

MEDIUM WALL SPIKES

The product

Wall spikes are a security system for industrial and sensitive sites. This type of obstacle consists of support bars topped with sharp spikes.

Generally attached to walls, fences, gates or roofs, wall spikes protect high-risk environments and prevent climbing.

Multiple types of wall spikes are available to suit the security needs of the site.

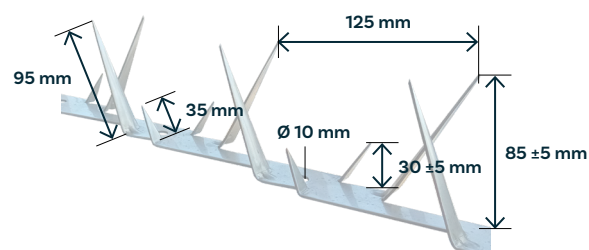

The Medium model (picture) consists of 2 types of angled spikes, one 35 mm high and the other 95 mm high. They are positioned at regular intervals of 125 mm.

Characteristics

- Support length : 1250 mm
- Support width : 45 mm
- Steel thickness : 2 mm
- Finish : galvanised
- Unit weight : 0.85 kg

FINISH	Galvanised
