

CONCERTINA FLAT

The product

Grid made of steel strips cut into blade shapes and crimped onto high-strength steel wire.

Concertina flat offers greater security than traditional grid razor blade. It's highly resistant thanks to its reinforced wire, which makes it particularly difficult to cut.

Its flat packaging takes up less space, but it's still ideal for protecting sensitive sites (airports, military sites, prisons, etc.).

Its sharp appearance reflects its aggressive, deterrent and high-protection properties.

Advantages

- Grid diameter 500, 600, 700 and 900 mm
- Length around 15 lm, including overlapping of the rolls on 50 cm
- BTO 22 mm blades
- Rich galvanised, 304 or 316L stainless steel
- Easy to install
- Reduced overhang (even when laid flat)
- Can be attached to a swing gate - no special modifications required
- BTO 10 / 25 / 28 also available

FINISH	DIAMETER (mm)	BLADE	ROLL LENGTH (lm)
Rich galvanised, 304 or 316L stainless steel	Ø 500 / 600 / 700 / 900	BTO 22	15
