Touchless Order Management From Mail to Confirmation:

Use AI and Transform
your Order Back Office

Sept 2024

WHICH PAINS DOES KAPTO RESOLVE?

THE CHALLENGE

- Digitizing and automating business processes “rooted” by **documents containing unstructured information**.
- Manage different templates, formats and types of documents where users have the freedom to organize the information contents and layout.

THE KAPTO'S ANSWER

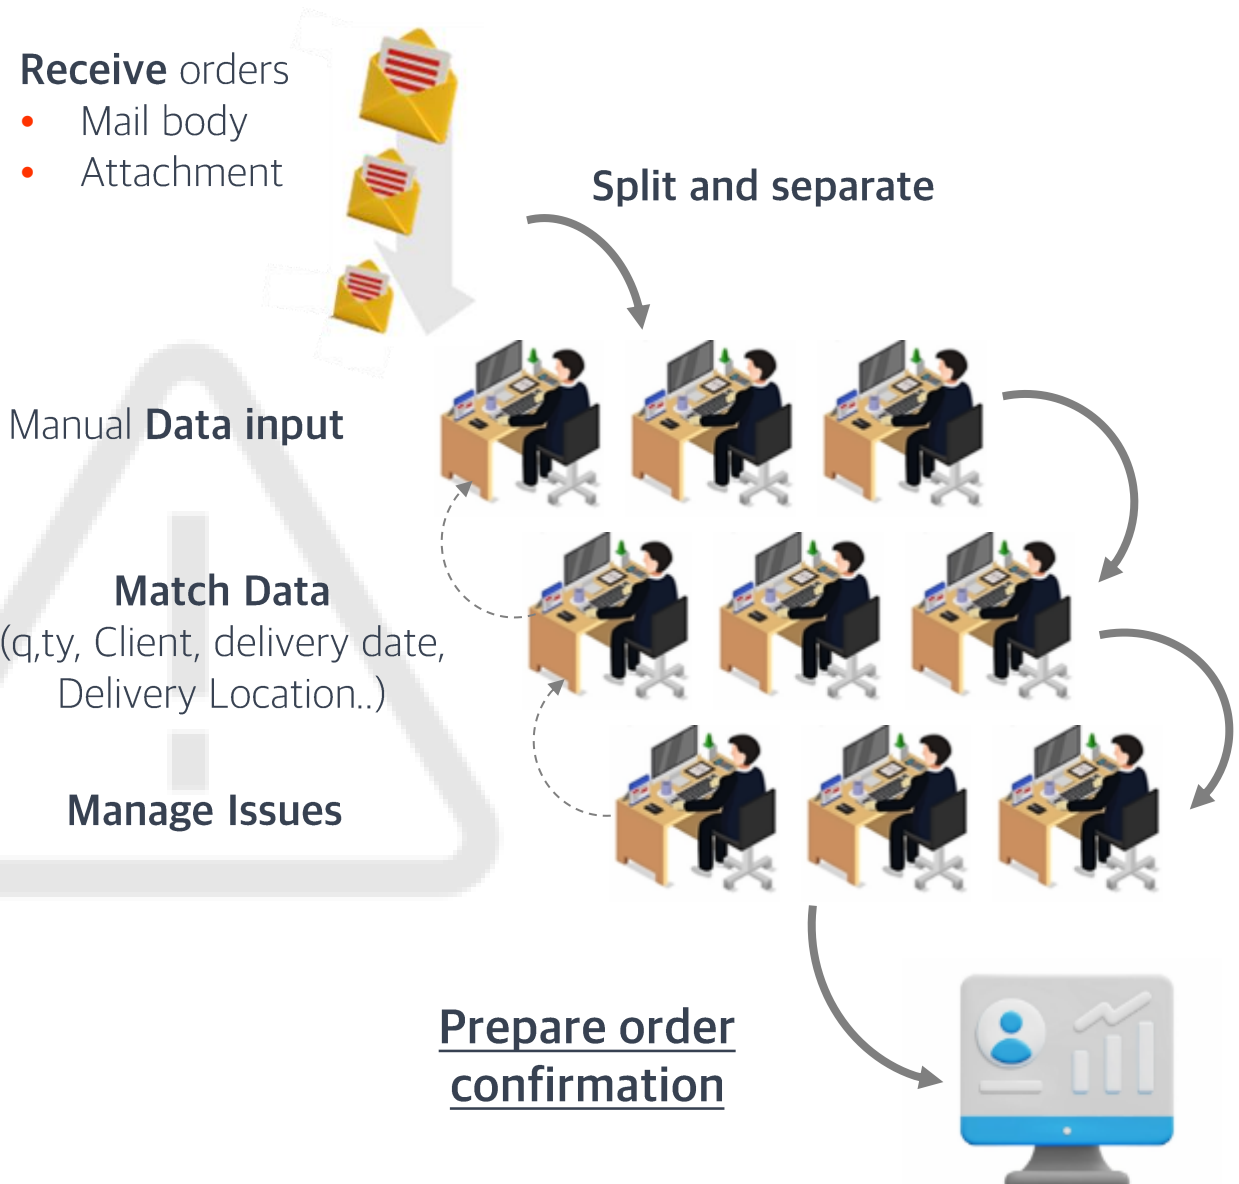

- KAPTO **uses a human-like approach** to unstructured information to understand, recognize and “information fil rouge” present in the document
- KAPTO AI's solution **combines artificial intelligence technologies** like NLP, image recognition, and semantic reasoning.
- The tool **automates processes, ensuring reliability comparable to structured transactions** in information systems, minimal to no human intervention is required, except in “extreme conditions”.
- We aim to the point where **no human intervention is ever required**.

THE ORDER INPUT MESS: HOW AVOID THE CHAOS?

TODAY

- Traditionally, the Order Intake (OI) process was labor-intensive, relying heavily on human intervention.
- The traditional EDI requires high volumes of order to payoff
- The order's Portal suffers of complex onboarding
- Still, it's fraught with potential inaccuracies, delays, and inconsistencies.

A REVOLUTIONARY SHIFT IN ORDER INTAKE POWERED BY AI

DISCOVER KAPTO'S ADVANCED AUTOMATION

Stepping into this arena, KAPTO revolutionizes the OI inbound process with state-of-the-art automation:

- **AI-Powered Precision:**
Central to KAPTO's approach is its advanced AI, adept at extracting and harnessing crucial details from Orders. This prowess paves the way for its efficient bidirectional matching, guaranteeing unmatched accuracy.
- **In-depth Bidirectional Matching:**
KAPTO delves deeper than surface-level data verification. It meticulously cross-references client's information, bolstering data consistency and reliability.
- **Seamless System Integration:**
More than just a tool, KAPTO melds effortlessly with existing sales systems, ensuring real-time updates to order management and financial metrics.
- **Harmonious Human-AI Collaboration:**
In the rare moments of data ambiguity, KAPTO doesn't blindly proceed. It beckons human intervention, flagging potential discrepancies for thorough review.

WHICH BENEFIT CAN I ACHIEVE?

KAPTO is more than a tool—it's the future of Good Receipt inbound process automation, today. This isn't just about faster operations; it's a smarter, more strategic approach.

The Benefits

- Dive into massive savings with a **60-70% reduction in operational costs.**
- Relish in a system boasting a **99% reduction in errors.**
- Empower your staff to **transcend mundane tasks, focusing on activities that truly add value.**

Shorten Time-to-Benefits

KAPTO is a **Full SaaS platform**, provided directly to the final users, completely configurable and executed without any need or intervention of AI/Tech people.

The implementation (set up to run) varies from the use case's complexity **from 6 to 10 weeks.**

SEE KAPTO IN ACTION *(cont.)*

The screenshot displays the KAPTO application interface. At the top, the header includes the KAPTO logo and a user profile icon. The main content area is divided into sections: 'Vendor Info' and 'Shipping Note Info'. The 'Vendor Info' section includes fields for Vendor, Vendor VAT, Address, City, Fiscal Code, and Country. The 'Shipping Note Info' section includes fields for Date and Number. A 'Quick Preview' section is also visible on the right. Below these sections is a table titled 'Lineltem' with columns: OrderNumber/Line, LineCode, Article, ProductCode, Description, Unit, and Qty. The table contains several rows of data. Annotations with red dashed boxes and arrows highlight specific features: 'Online Vendor list available' points to the Vendor field; 'Change date/SN n°' points to the Date and Number fields; 'Open order with the Vendor (with candidate suggestion)' points to the 'Search order...' dropdown menu; and 'Qty, articles in the order, with expected q.ty (with candidates suggestion)' points to the table rows. A red exclamation mark icon is also present in the center of the interface.

The Smart Company Ltd

You can leave message on the single flow of SN

Issue management (automatable)

The Smart Company Ltd

You can leave message on the single Shipping note Row

You can send (automatic) messages to internal dept. (Engineering, Quality, Purchasing, etc.) or to the Supplier with Shipping Note attached to manage issues (automatable)

WHY KAPTO IS DIFFERENT?

Our technology enables greater digitization and automation at a significantly lower cost.

We change the profile and content of back-office operations in the companies we work with.

We also **radically change the profile of the organization** in our clients. We free up time and human resources to be dedicated to value-added activities.

We develop modern and "hybrid" organizations to **combine human and artificial intelligence** at best and create concrete prerequisites to make your company more competitive.

We do it in a short time, without long and complex projects, with a hands-on approach focused on results.

KAPTO AI:
We make possible
the impossible automation
