

# Circle 5 Syllabus

## Course Summary

This course is meant for students ages 8 to 11 who have completed the Common Core (or equivalent) for Grade 4. Students will be exposed to the Focus Areas section listed below, and we expect students to master the skills listed in the Expected Outcomes section listed below.

## Focus Areas at this Level

Concepts, skills, and learning tools students see in this course include, but are not limited to:

- Understanding factors, primes, factorizations, and expanding powers
- Expand order of operations to include exponents, parentheses and absolute value
- Introducing integers, probability and counting principles

## Expected Outcomes

Students will be **expected to adequately perform in or explain** the following areas after course completion:

- Rounding by place value up and down to 100,000,000s and 1,000ths
- Addition and subtraction of fractions and decimals numbers
- Multiplication of one number by another (whole or fractions)
- Division of one number by a whole with remainders
- Understanding fractions, how to operate with them and how to make equivalent fractions
- Using integers and decimals and simple operations with them
- Using counting principles and probability
- Properties (like perimeter and area) of shapes, including triangles and circles

## Pre Requisites

Students registering for this course should be **comfortable with the following Math**:

- Identifying numbers up to 100,000,000
- Comfortable with arithmetic operations: addition and subtraction (3-digits), multiplication and division (both 2-digit operands)
- Adding simple fractions with one denominator being a multiple of the other denominator
- Simple order of operations with addition, subtraction, parentheses and multiplication

Students should also be **willing and able to**:

- Communicate in English at a beginner's level
- Be respectful of other students in their classes
- Practice writing things down on paper
- Share their thoughts with the instructors to help them discover solutions to their problems
- Take constructive criticism when it comes to their learning habits

## Course Materials (Required)

- All classes will be taught online, via [Zoom](#). Your student will need a device with a microphone and camera.

- Parents are expected to have read and understood the Parent Handbook
  - Parents should review the expectations in class with their student(s)
  - Parents of this age group will need to help their students learn the technology used on the student's end

Students should also have access to:

- Ruler
- Pencils
- Eraser
- Paper
- Colored pencils or markers
- Reliable internet connection and digital device capable of using Zoom effectively

## Homework Expectations

Homework at EMC is set up to be flexible for the needs of your student. Usually we feel students fall into three general categories:

- EMC is **replacing public school or** accelerating my student for **testing out of Math** in the future
  - All Homework is **mandatory**
- EMC is helping **improve my grades or skills**
  - Homework is **highly recommended**, we recommend concentrating on school homework first
- EMC is for **interest's sake** and/or for **exposure** to problem solving **before seeing it in school**
  - Homework is **recommended, yet optional**

## Homework Delivery

Homework is delivered in a two main ways:

- **Practice Homework**
  - Nearpod, an interactive slideshow, facilitates self-paced learning including lesson review and extra practice at the end of each Content section
    - Lesson slides you already may have seen are provided as reference for review
    - Draw It, Quiz or Matching slides are the **mandatory practice**
    - "Extras" are extra practice and competition style questions to keep other skills sharp
  - PDFs to download and print the lesson or questions are also made available
- **Assessment Homework** (aka Quizzes, Tests)
  - Canvas, set of questions to show instructors a student's understanding of the content
  - Auto-graded upon submission
  - Instructors adjust grades after seeing results to give partial marks where appropriate, and plan to cover certain problem areas in the Homework Check portion of next class

# Course Calendar

On yellow dates on the calendar below, no classes are held. Some days of the week (Sat, Sun, Mon) have less classes per year. These courses will have slightly condensed in-class schedules, and your instructor will let you know which homework assignments to do each week.

First and Last Day of School  
 School Holidays & Vacations

Aug 17 First Day of Classes  
 Sep 5 - 7 Labor Day Weekend - No Classes  
 Nov 23 - 29 Thanksgiving Week - No Classes  
 Dec 21 - Jan 3 Winter Break - No Classes

Apr 12 - 18 Spring Break - No Classes  
 May 29 - 31 Memorial Day - No Classes  
 Jun 13 Last Day of School

## Course Itinerary

Chapter	Lesson	Class Dates	Focus Skills
Chapter 1: Order of Operations	1) Order of Operations	Aug 17- Aug 23	<ul style="list-style-type: none"> <li>replacing PEMDAS</li> <li>reviewing operations and parentheses</li> </ul>
	2) Distributive Property	Aug 24 - Aug 30	<ul style="list-style-type: none"> <li>multiplying distributively</li> <li>what order do we distribute in</li> </ul>
Chapter 2: Applying Multiplication	3) Multiplication Algorithms	Aug 31 - Sept 6 OFF Sat Sept 5, Sun Sept 6 Labor Day	<ul style="list-style-type: none"> <li>Japanese visual algorithm</li> <li>dance partner algorithm</li> <li>classic stacking algorithm</li> </ul>
	4) Powers	Sept 7 - Sept 13 OFF Mon Sept 7 Labor Day	<ul style="list-style-type: none"> <li>define power, base, exponent</li> <li>expanded vs exponent form</li> </ul>
	5) Perfect Squares	Sept 14 - Sept 20	<ul style="list-style-type: none"> <li>perfect squares under <math>20 \times 20</math></li> <li>visually understanding squares</li> </ul>
	6) Alternate Bases	Sept 21 - Sept 27	<ul style="list-style-type: none"> <li>base 10 versus binary (base 2)</li> <li>base 10 versus hexadecimal (base 16)</li> </ul>
Chapter 3: Division	7) Division	Sept 28 - Oct 4	<ul style="list-style-type: none"> <li>define divisor, dividend, quotient and remainder</li> <li>learn to divide with remainders</li> </ul>
	8) Long Division	Oct 5 - Oct 11	<ul style="list-style-type: none"> <li>partial quotient</li> <li>long division</li> </ul>
Chapter 4: Integers	9) Intro-gers	Oct 12 - Oct 18	<ul style="list-style-type: none"> <li>defining positive, negative and integer</li> <li>models of integers</li> </ul>
	10) Adding and Subtracting	Oct 19 - Oct 25	<ul style="list-style-type: none"> <li>adding positive with negatives on a number line</li> <li>subtracting with negatives as paying off a loan</li> </ul>
	11) Absolute Value	Oct 26 - Nov 1	<ul style="list-style-type: none"> <li>define magnitude (length) vs absolute value</li> <li>applying absolute value to Order of Operations</li> </ul>
Chapter 5: Equations	12) Creating Equations	Nov 2 - Nov 8	<ul style="list-style-type: none"> <li>how to write an equation from a word problem</li> <li>how to simplify numbers in equations</li> </ul>
	13) One-Step, Two-Step	Nov 9 - Nov 15	<ul style="list-style-type: none"> <li>how to solve by using an inverse operation</li> <li>applying inverse operations in reverse order</li> </ul>

	<b>14) Systems of Equations</b>	Nov 16 - Nov 22	<ul style="list-style-type: none"> <li>• simple systems of equations</li> </ul>
<b>Holiday</b>	<b>Thanksgiving</b>	<b>OFF</b> Nov 23 - Nov 29	<b>Have a great week!</b>
<b>Chapter 6: Factors</b>	<b>15) Divisibility and Divisibility Tests</b>	Nov 30 - Dec 6	<ul style="list-style-type: none"> <li>• define factor, multiple and divisible by</li> <li>• introduce some common divisibility tests</li> </ul>
	<b>16) Prime Factorization</b>	Dec 7 - Dec 13	<ul style="list-style-type: none"> <li>• define prime, coprime, composite</li> <li>• how to use a tree diagram to create a prime factorization in power form</li> </ul>
<b>17) Midterm Review</b>		Dec 14 - Dec 20	<ul style="list-style-type: none"> <li>• Review of Chapters 1 through 5</li> </ul>
<b>Holiday</b>	<b>Winter Break</b>	<b>OFF 2 WEEKS</b> Dec 21 - Jan 3	<b>Have a great break!</b>
<b>Chapter 6: Factors</b>	<b>18) Simplifying with Factors</b>	Jan 4 - Jan 10	<ul style="list-style-type: none"> <li>• reviewing fractions</li> <li>• canceling like factors in a fraction</li> </ul>
<b>Chapter 7: Fractions</b>	<b>19) Mixed vs Improper</b>	Jan 11 - Jan 17	<ul style="list-style-type: none"> <li>• converting between mixed and improper</li> <li>• adding fractions (common denominator)</li> </ul>
	<b>20) Adding with Fractions</b>	Jan 18 - Jan 24	<ul style="list-style-type: none"> <li>• finding a common denominator (<math>d_1d_2</math> OR <math>kd_1 = d_2</math>)</li> <li>• able to add and subtract most fractions</li> </ul>
	<b>21) Skip Counting and Subtraction</b>	Jan 25 - Jan 31	<ul style="list-style-type: none"> <li>• subtracting mixed numbers</li> <li>• skip counting then multiplying fractions</li> </ul>
<b>Chapter 8: Advanced Fractions</b>	<b>22) Multiplying Fractions</b>	Feb 1 - Feb 7	<ul style="list-style-type: none"> <li>• using skip counting to multiply by a whole</li> <li>• formal algorithm</li> </ul>
	<b>23) Mixed Number Multiplication</b>	Feb 8 - Feb 14	<ul style="list-style-type: none"> <li>• Discussion: improper = best for operations mixed = talking or answers</li> <li>• multiplying mixed numbers by whole numbers (distributive)</li> <li>• multiplying mixed numbers by fractions (improper conversion)</li> </ul>
	<b>24) Reciprocals and Division</b>	Feb 15 - Feb 21	<ul style="list-style-type: none"> <li>• defining reciprocals</li> <li>• using reciprocals to divide by a fraction</li> </ul>
<b>Chapter 9:</b>	<b>25) Decimal Place Values</b>	Feb 22 - Feb 28	<ul style="list-style-type: none"> <li>• tenths down to hundred millionths</li> <li>• get the next value by dividing by 10</li> </ul>

<b>Decimals</b>	<b>26) Comparing and Rounding</b>	Mar 1 - Mar 7	<ul style="list-style-type: none"> <li>ordering decimal numbers by their most significant digits</li> <li>rounding to the nearest tenth, hundredth or thousandth</li> </ul>
<b>27) Spring Review</b>		Mar 8 - Mar 14	<ul style="list-style-type: none"> <li>Review of Chapters 6 through 9</li> <li><b>Math Map</b> Where does this go?</li> </ul>
<b>Chapter 9: Decimals</b>	<b>28) Decimal Operations</b>	Mar 15 - Mar 21	<ul style="list-style-type: none"> <li>Adding &amp; Subtracting</li> </ul>
<b>Chapter 10: Statistics</b>	<b>29) Possibilities</b>	Mar 22 - Mar 28	<ul style="list-style-type: none"> <li>enumeration as a tool when counting possible outcomes</li> </ul>
	<b>30) Addition Principle</b>	Mar 29 - Apr 4	<ul style="list-style-type: none"> <li>addition principle: subtract the overlap</li> <li>using Venn diagrams to find the overlap</li> </ul>
	<b>31) Multiplication Principle</b>	Apr 5 - Apr 11	<ul style="list-style-type: none"> <li>multiply when you have a list of choices, factorial notation</li> <li>using tree diagrams to illustrate choice</li> </ul>
<b>Holiday</b>	<b>Spring Break</b>	<b>OFF</b> Apr 12 - Apr 18	<b>Have a great week!</b>
<b>Chapter 10: Statistics</b>	<b>32) Probability</b>	Apr 19 - Apr 25	<ul style="list-style-type: none"> <li>define events, outcomes and probability</li> <li>computing as a fraction</li> <li>using factorials</li> </ul>
	<b>33) Dependent vs Independent Events</b>	Apr 26 - May 2	<ul style="list-style-type: none"> <li>identifying event types</li> <li>connecting events to counting principles</li> </ul>
<b>Chapter 11: Geometry</b>	<b>34) Angles</b>	May 3 - May 9	<ul style="list-style-type: none"> <li>measuring, naming and identifying</li> <li>right and straight angle identities</li> <li>parallel and perpendicular lines</li> </ul>
	<b>35) Polygons &amp; Area</b>	May 10 - May 16	<ul style="list-style-type: none"> <li>area formulas of polygons (triangles, squares, rectangles, rhombus, kite, isosceles trapezoid, regular hexagon)</li> <li>using triangles for more complex polygons</li> </ul>
	<b>36) Circles</b>	May 17 - May 23	<ul style="list-style-type: none"> <li>define a circle, radius, diameter and <math>\pi</math></li> <li>finding the circumference of a circle</li> </ul>
	<b>37) Area of a Circle</b>	May 24 - May 30 <b>OFF Sat Sun May 29 and 30</b> <b>Memorial Day</b>	<ul style="list-style-type: none"> <li>finding the area of a circle</li> <li>circle word problems</li> </ul>
	<b>38) Circles in 3D</b>	May 31 - June 6 <b>OFF Mon May 31</b> <b>Memorial Day</b>	<ul style="list-style-type: none"> <li>nets and surface area</li> <li>surface area and volume of cylinders</li> <li>volume of cones</li> </ul>

**39) Final Review**

June 7 - June 13

• Review of Chapters 6 through 11
