CAPITAL MANAGEMENT

DISCLOSURES

1. Cardinal Capital Management, Inc. is an independent portfolio manager registered under the Manitoba Securities Act, S50. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
2. The Canadian Equity (USD) Composite includes all segregated (separate portfolios) fee-paying discretionary portfolios that include large-cap Canadian-domiciled publicly traded stocks listed on a recognized U.S. stock exchange with large capitalizations and may include some fixed income to a weighting of less than 10%. The stocks included in these portfolios tend to be conservative, large-capitalization stocks selling at below-average P/E ratios and above-average dividend yields. The composite was redefined effective January 1, 2020 to allow for the inclusion of 0%-15% non-Canadian content and effective January 1, 2021 to allow for inclusion of equity and/or fixed income pooled funds or mutual funds. Portfolios do not utilize derivative instruments, hedging or leverage. This composite includes both taxable and non-taxable portfolios. The minimum portfolio size for inclusion in the composite is \$10,000.
3. The benchmark: The S&P/TSX Total Return USD Index.
4. Valuations are computed and performance is reported in U.S. dollars.
5. Returns represent past performance. Past performance does not guarantee future results. Returns shown are total returns, including realized and unrealized gains and losses plus income.
6. Gross-of-fees returns are presented before management fees but after the deduction of brokerage commissions and applicable non-resident withholding taxes paid. Net-of-fees returns are calculated by deducting actual management fees from the gross-of-fees returns. The firm's annual fee schedule is as follows:

Value of Assets	Equities	Bonds & Cash
First \$2.0 million	1.50%	1.00%
Next \$3.0 million	1.25%	0.75%
Next \$5.0 million	1.00%	0.50%
Over \$10 million	Negotiated	

7. This composite was created in 2010 and retroactively applied back to January 1, 2004, the inception date. A complete listing and description of the firm's composites is available upon request. The firm's list of pooled fund descriptions for limited distribution pooled funds is also available upon request.
8. Internal dispersion is calculated using the size-weighted standard deviation of the annual gross-of-fees returns of all portfolios that were included in the composite for the entire year.
9. The three-year annualized ex-post standard deviation measures the variability of the composite's gross returns and the benchmark over the preceding 36-month period.
