CAPITAL MANAGEMENT

DISCLOSURES

1. Cardinal Capital Management, Inc. is an independent portfolio manager registered under the Manitoba Securities Act, S50. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
2. The Cardinal Growth Composite includes all segregated (separate portfolios) fee-paying discretionary balanced portfolios that have a 20% to 40% allocation to Canadian common equities and investment trusts, with a typical allocation of 25% to 35%. A 60% to 80% allocation to non-Canadian (U.S. or international) common equities and investment trusts, with a typical target allocation of 65% to 75% and may include some fixed income to a weighting of less than 10%. Portions of segregated portfolios may be invested in equity and/or fixed income pooled funds or mutual funds. The stocks included in these portfolios tend to be conservative, large capitalization companies with long term records of earnings and dividend growth, strong balance sheets, above average profitability levels and global business franchises. The stocks typically have an annual dividend growth record of 10% or greater. Portfolios do not utilize derivative instruments, hedging or leverage. This composite includes both taxable and non-taxable portfolios. The minimum asset value of portfolios in the composite is \$10,000.
3. The custom benchmark: The weighted benchmark is comprised of taking the approximate blend for each month between the market value of Canadian equities and non-Canadian equities. For instance, if in a given month the market value of Canadian equities was 30%, U.S. equities was 45%, and international equities was 25% then the weighted benchmark would be derived by the sum of 30% of the performance of the S&P/TSX Total Return Index, 45% of the S&P 500 Total Return CAD Index, and 25% of the MSCI EAFE CAD Total Return Index.
4. Valuations are computed and performance is reported in Canadian dollars.
5. Returns represent past performance. Past performance does not guarantee future results. Returns shown are total returns, including realized and unrealized gains and losses plus income.
6. Gross-of-fees returns are presented before management fees but after the deduction of brokerage commissions and applicable non-resident withholding taxes paid. Net-of-fees returns are calculated by deducting actual management fees from the gross-of-fees returns. The firm's annual fee schedule is as follows:

Value of Assets	Equities	Bonds & Cash
First \$2.0 million	1.50%	1.00%
Next \$3.0 million	1.25%	0.75%
Next \$5.0 million	1.00%	0.50%
Over \$10 million	Negotiated	

7. This composite was created in 2021. The composite's inception date is June 1, 2021. A complete listing and description of the firm's composites is available upon request. The firm's list of pooled fund descriptions for limited distribution pooled funds is also available upon request.
8. Internal dispersion is calculated using the size-weighted standard deviation of the annual gross-of-fees returns of all portfolios that were included in the composite for the entire year.
9. The three-year annualized ex-post standard deviation measures the variability of the composite's gross returns and the benchmark over the preceding 36-month period.
