

BCS Women in Cardiology Buddy Scheme Privacy Notice

What is the purpose of the Buddy Scheme?

The Women in Cardiology Buddy Scheme is an initiative designed to support colleagues as they return to work following maternity leave, illness, caring responsibilities, or other extended time away. This informal peer-support system connects returning cardiologists with experienced colleagues who can offer a listening ear, share practical advice, and provide encouragement during what can often be a challenging transition back to work.

How will the buddy scheme work?

- Participants are matched based on role, experience, region, and preferences.
- The buddy makes the initial contact and provides informal support by checking in regularly, offering encouragement, and being available to talk through challenges.
- The relationship is flexible, informal, and confidential.
