

Ohmium® Remote Monitoring & Services

OEM expertise, real-time monitoring, and lifecycle services designed to help you maximize availability, efficiency, and long-term operational success.

A Complete Lifecycle Support Framework

Ohmium combines remote operations expertise with proactive lifecycle services to help operators improve performance, reduce downtime, and extend equipment life.

1

MONITOR

24/7 visibility into system health, alarms, events, and operating conditions.

2

OPTIMIZE

Data-driven insights and performance recommendations to improve efficiency and hydrogen output.

3

SUPPORT

Remote and on-site technical assistance, training, and operational guidance.

4

SUSTAIN

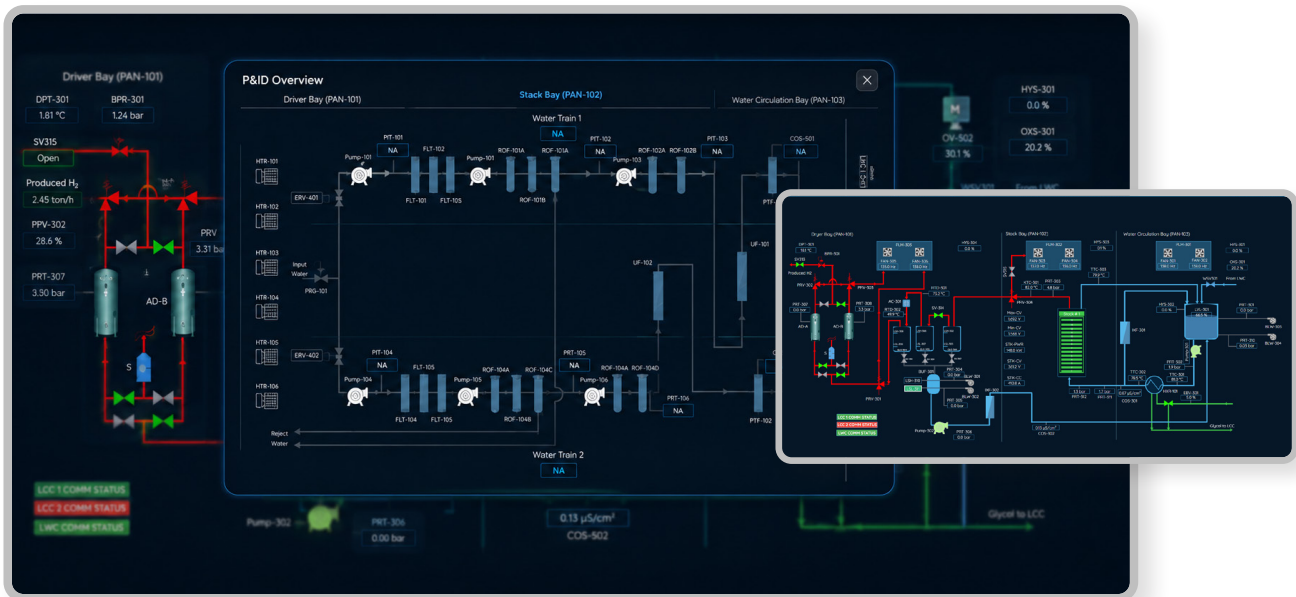

Lifecycle services including stack support, spare parts management, upgrades, and long-term maintenance planning.

Insights and service visits inform and improve each cycle over the life of the asset.

Monitor & Optimize

Always-On Monitoring for Peak Performance

The Ohmium Remote Operations Center (ROC) provides continuous visibility into plant performance, enabling early issue detection, operational optimization, and proactive support.

MONITOR

- ✓ 24/7 equipment monitoring
- ✓ Safety alarm and event tracking
- ✓ Asset health management
- ✓ Operational performance reporting
- ✓ Real-time system visibility

OPTIMIZE

- ✓ Ongoing system optimization
- ✓ Root cause analysis and troubleshooting
- ✓ Recommendations to improve operations
- ✓ Predictive maintenance insights

Transform operational data into actionable performance improvements.

Support & Sustain

Peak Performance at Every Stage

Ohmium delivers lifecycle expertise that helps operators sustain reliability, maintain safety, and extend asset life.

SUPPORT

- ✓ Remote technical assistance
- ✓ On-site interventions and maintenance support
- ✓ Operator and maintenance training
- ✓ Support for hardware and system improvements
- ✓ Technical support for safety upgrades

SUSTAIN

- ✓ Stack lifecycle management
- ✓ Spare parts and consumables planning
- ✓ Inventory management support
- ✓ Safety-level upgrade recommendations
- ✓ Long-term maintenance planning
