

Authorized product data directly from the source.

OnePDX (Product Data Exchange) leverages Supply Cloud's one-to-many architecture, connecting distributors to their trade network to automatically acquire and harmonize product information from multiple suppliers. Data is structured and enhanced to make it e-commerce-ready for internal systems and for syndication across digital channels, while ensuring descriptions, specifications, and digital assets remain accurate and current, wherever they appear. And by augmenting OnePDX with inventory and pricing information from their ERP, distributors can easily connect to popular e-commerce platforms like Shopify, WooCommerce, and others to enable high fidelity, end-to-end online order fulfillment.

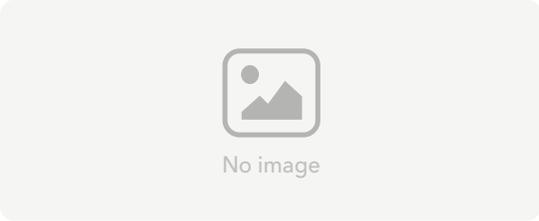

When product information is missing, customers lose trust.

Today's buyers expect a user-friendly e-commerce experience browsing catalogues and placing orders online. But for distributors, manually acquiring and maintaining large amounts of accurate and consistent product data from multiple suppliers is difficult. OnePDX automates product data syndication for distributors so they can deliver a seamless e-commerce experience to their customers, eliminating the frustration and expense associated with traditional methods.

Power every channel with superior product data.

Without OnePDX

Power Drill
★★★★★ 12 reviews
\$499.99

Description
Lorem ipsum dolor sit amet, consectetur adipiscing

Specifications

Video

- Incomplete and out-of-date product listings
- Manual supplier product data acquisition
- Repetitive, labour-intensive data maintenance
- Poor buying experience for customers
- Negative impact on product sales
- Increased customer support and returns

With OnePDX

Power Drill
★★★★★ 12 reviews
\$499.99

Description
A powerful drill with a brushless motor, variable speed control, and ergonomic design.

Specifications

- Brushless motor
- 1,800 RPM
- 1/2" Keyless Chuck

Video

- Current and complete product listings
- Automatic product data synchronization
- Minimal data maintenance required
- Modern e-commerce shopping experience
- Increased sales and customer satisfaction
- Reduced returns and complaints

“Constantly downloading, reformatting and manually updating our product catalogue was time-consuming and inefficient. Now, OnePDX helps us automatically maintain a digital catalogue that’s always current and always complete.”
