*The equipment shown is a computer visualisation only; the actual product will look similar. Colours may vary from those shown. Construction materials can be tailored to the customer's requirements. Dimensional tolerance +/- 5cm.*

## Why Choose This Product

Climbing and spinning combined in one tall unit: a conical rope net rises from a rotating base, so children clamber the ropes while the whole structure turns beneath them. It packs grip, balance, core strength and teamwork into a compact circular footprint.

- Constructed from galvanised, powder-coated steel with Ø16 steel-cored PP climbing ropes and a sealed central bearing
- Certified to BS EN 1176-1+A1:2024 for public playground safety
