Technical Data

DIMENSIONS

23.2 x 4 m

SAFETY ZONE

26.5 x 4 m

HEIGHT

3.5 m

FREE-FALL HEIGHT

1.1 m

Conforms to: BS EN 1176-1:2017

Dimension Drawing

Robinia Commercial Zip Wire

Materials & Construction

Structure: robinia (acacia) hardwood posts and boards

Frame: galvanised steel profile 100x100, powder-coated

Seat: injection-moulded TPE seat

Cable: 10mm steel zip cable

Chain: 6mm dia galvanised steel chain with rubber protective sleeve

Decking: anti-slip film-faced plywood

Fixings: anti-corrosion, plastic-capped bolts

Warranty: 48 months whole unit / 15 years structural

In accordance with BS EN 1176-1:2017, this product requires impact-absorbing surfacing appropriate to its free-fall height.

Owing to the natural, irregular form of the timber, unit dimensions may vary slightly from those stated.

The equipment shown is a computer visualisation only; the actual product will look similar. Colours may vary from those shown. Construction materials can be tailored to the customer's requirements. Dimensional tolerance +/- 5cm.

Why Choose This Product

The Robinia Commercial Zip Wire pairs the same fast, flowing ride as our steel model with the natural character of robinia hardwood, making it a natural fit for woodland trails, nature-themed schemes and landscape-led playgrounds. Durable robinia posts carry the cable run, while a moulded TPE seat and smooth trolley give riders a swift, controlled glide. Robinia is a naturally durable, weather-resistant hardwood chosen by architects and developers for its warm, organic look.

- Naturally durable robinia hardwood frame for a warm, organic aesthetic
- Single-seat cable ride for balance, coordination and confidence
- Moulded TPE seat and smooth trolley on a 10mm steel cable
- Certified to BS EN 1176-1:2017 for public playground safety
