Why Choose This Product

The Maths Chalkboard panel pairs a real chalk drawing surface with 13 spinning wheels that light up in colour. Children can chalk sums, letters and pictures on the board, then spin the glowing wheels set into the frame, building early maths, mark-making and fine motor skills as they play. Adapted for children who use wheelchairs, it gives up to four children a shared place to draw, count and create, and works equally well in an outdoor classroom, a nursery garden or an inclusive public playground.

- 8 mm HPL chalkboard with a built-in chalk tray, made for everyday outdoor use
- 13 spinning wheels that light up in colour as children turn them
- Adapted for wheelchair users, so up to 4 children can play side by side
- Certified to BS EN 1176-1 for public playground safety
