Seat & footplates: HDPE
Finish: Powder coating over a zinc primer for long-term corrosion protection
Moving parts: Sealed 2RS maintenance-free ball bearings
Fixings: Acid-resistant bolts with stainless steel washers and dome nuts; tube ends welded closed
Colours: Lime (NCS S 1070-G50Y) and navy (RAL 5003) as standard; other RAL colours available
Foundations: Bolted to a concrete footing or precast base set 30 cm below ground level

Free-fall height is under 1 m, so BS EN 16630 allows grass or turf as well as impact-absorbing surfacing. We'll recommend the right finish for your site.

How to Use

Bike

Sit on the seat, hold the handle firmly and pedal forwards at your own pace.

Benefits:

Works the legs and glutes and gets the circulation going — and helps children who can't yet ride a bike learn the pedalling action.

Stepper

Hold the handles, stand on the footplates and shift your weight from one leg to the other.

Benefits:

Strengthens the legs and glutes and develops balance.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A seated bike and a standing stepper on one frame, so two children can exercise together. The bike gives a steady, low-impact leg workout and teaches the pedalling action; the stepper builds leg strength and balance. A popular pairing for school playgrounds and parks.

- Two of the most popular children's gym exercises on one compact frame
- Sealed maintenance-free bearings for smooth, quiet movement
- Certified to BS EN 16630 for outdoor fitness equipment
