Technical Data

DIMENSIONS (L x W)

3.10 x 3.10 m

HEIGHT

3.00 m

SAFETY ZONE

5.30 x 5.30 m

FREE-FALL HEIGHT

2.10 m

Capacity: 8 users Recommended age: 3–15 years

Conforms to: BS EN 1176

Safety Zone Plan

Large Pyramid Rope Climber

Materials & Construction

Central post: Galvanised steel

Climbing net: Rope net tensioned from the top of the post to ground anchors at each corner

Connectors: Plastic rope connectors at the net junctions

With a free-fall height of 2.10 m, impact-absorbing surfacing to EN 1177 is required across the whole safety zone — for example wetpour or bonded rubber mulch tested to this height, or loose-fill at 400 mm depth. We'll recommend the right finish for your site.

How to Use

Pyramid net

Children climb the net from any side towards the top of the post, crossing between the walls and choosing their own route up and down.

Benefits:

Builds grip and upper-body strength, balance, coordination and confidence at height.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check rope tension, connectors and anchors at each operational check, and replace worn or damaged parts promptly with genuine spares. Mortis Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A 3.0 m rope pyramid that children can climb from every side, with an open net that keeps them in view from all round the safety zone. A steeper, taller climb on a compact base — a step up from the medium pyramid.

- Climbable from all four sides, so several children can use it at once
- Galvanised steel post with a tensioned rope net and ground anchors
- Certified to BS EN 1176
- Designed, supplied and installed by Mortis Sport & Play's own teams
