Robinia Triangular Climbing Tower

Materials & Construction

Posts & beams: Robinia hardwood posts and log beams on a triangular plan, 1.82 m per side
Climbing: Climbing wall panel with holds and a porthole, and a sloping rope net
Platform: Rope net platform inside the tower
Exit: Curved steel twin-rail slide
Foundations: Posts set in the ground in concrete

With a free-fall height of 2.4 m, impact-absorbing surfacing to EN 1177 is required across the 43 m² safety zone (loose fill at least 400 mm deep). We'll recommend the right finish for your site.

How to Use

Climb up

Children climb into the tower by the climbing wall or the sloping net and onto the rope net platform.

Benefits:

Builds grip, upper-body strength and confidence at height.

Slide down

They come back down on the curved twin-rail slide, holding the rails as they go.

Benefits:

Develops coordination, grip and body control.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check nets and ropes for wear, climbing holds and fixings for tightness, and timber for splits around fixings. Replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A compact Robinia climbing tower on a triangular plan, with a climbing wall, a sloping net and a net platform inside, and a curved twin-rail slide to come down. It packs climbing and sliding into a 43 m² safety zone and suits children from age 3.

- Climbing wall, net and slide on a compact triangular frame
- Recommended from age 3, with a 43 m² safety zone
- Robinia hardwood: naturally durable, no preservatives needed
- Designed, supplied and installed by Morti Sport & Play's own teams
