Robinia Outdoor Classroom Shelter

Materials & Construction

Posts: Eight round Robinia hardwood posts, set 0.9 m into the ground

Roof: Eight-sided hipped roof of horizontal timber boards on round timber rafters

Finish: Natural, unpainted timber; Robinia weathers to a silver-grey

This is a shelter, not play equipment, so no impact-absorbing surfacing is needed. Grass, bark or a hard surface can go underneath to suit how the space will be used.

Images are computer visualisations; the installed product will look similar. Colours may vary from those shown.

Using the Space

Outdoor classroom

Open on all sides, the shelter gives a group room for lessons, story time and forest school sessions, and gives a dry, shaded meeting point in parks and community spaces.

Why it works:

Gets learning outdoors in most weather, and its natural Robinia structure blends into school grounds, woodland and green spaces.

Inspection & Maintenance

Inspect the posts, roof boards and fixings regularly and after storms; keep the roof clear of leaves and debris, and replace any split or loose boards promptly. Robinia needs no preservative and will weather to a silver-grey. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

An eight-sided Robinia shelter with a boarded hipped roof and open sides, made as an outdoor classroom and meeting point. The 5 m model is shown here; we supply other diameters to suit the site and the group size.

- Robinia hardwood posts that need no preservative
- Open sides on all eight faces for easy access and good visibility
- Available in a range of sizes to suit the site
- Designed, supplied and installed by Morti Sport & Play's own teams
