Tall Robinia Slide with Stainless Steel Chute

Materials & Construction

Structure: Robinia hardwood posts, about Ø18 cm, with no sharp edges; anchored 0.6–0.8 m into the ground
Platform: Robinia timber, 1.8 m high
Slide: Stainless steel chute, 3.19 m
Ladder & handrails: Stainless steel ladder and handrails; hand grips in steel-core rope with polypropylene braid
Fixings: Stainless steel screws or screws with plastic caps

Free-fall height is 1.8 m, so EN 1177 impact-absorbing surfacing is needed across the safety zone, for example 300 mm of bark or woodchip, or an attested synthetic surface such as wetpour. We quote it alongside the equipment. The slide should not face south.

Images are computer visualisations; the installed product will look similar. Colours may vary from those shown.

How to Use

Slide

Children climb the stainless steel ladder to the Robinia platform at 1.8 m, hold the handrails and rope grips at the top, and slide down the 3.19 m stainless steel chute.

Benefits:

Builds climbing confidence, coordination and balance, with a longer, faster ride than our 1.2 m slide.

Inspection & Maintenance

Routine visual check weekly (daily on busy sites), an operational check every 1–3 months and a main inspection once a year. Check the chute for damage and sharp edges, the ladder, handrails and rope grips for wear, and posts and fixings for movement. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A taller freestanding Robinia slide for schools and parks that want a longer ride in a small footprint.

- 1.8 m platform and 3.19 m stainless steel chute
- Stainless steel ladder and handrails for long outdoor life
- Installs in about 1.5 hours
- Designed, supplied and installed by Morti Sport & Play's own teams
