Certification: TÜV certified

Safety Zone Plan

□ Safety zone — 7.50 x 3.50 m, 28 m²

*Indicative plan, not to scale.
Exact zone confirmed at survey.*

Robinia Two-Seat Swing

Materials & Construction

Frame: Robinia A-frame posts with a Robinia log crossbeam

Seats: Two black rubber flat seats

Suspension: Chains on top-mounted swing hangers

Weight: 320 kg in total; heaviest part 60 kg

Free-fall height is 1.50 m, so the whole safety zone needs impact-absorbing surfacing: EN 1177 synthetic surfacing tested to 1.5 m, or 300 mm of bark, woodchip, sand or gravel. Grass is not suitable. We'll recommend the right finish for your site.

How to Use

Swing

Sit in the middle of the seat, hold a chain in each hand and pump the legs forwards and back to build height. Keep clear of the swing path when walking past.

Benefits:

Builds core and grip strength, balance, rhythm and coordination, and lets two children swing together.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check the swing hangers, chains and seats for wear, and the posts for soundness at ground level. Replace worn or damaged parts promptly with genuine spares. Mortis Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A classic two-seat swing in natural Robinia. The A-frame and log crossbeam suit natural play areas, school grounds and parks, and the rubber flat seats are the familiar choice for children aged 3 and over.

- Two flat seats so children can swing side by side
- Robinia frame with a log crossbeam
- TÜV certified
- Designed, supplied and installed by Mortis Sport & Play's own teams
