Robinia Spring Rocker
Materials & Construction

Seat: Natural Robinia log, approx. Ø 22 cm, with no sharp edges. As natural timber, dimensions may vary by ±5 cm
Handle: Stainless steel hoop handle
Spring: 20 mm steel coil spring, phosphated and powder-coated
Steel fittings: Galvanised and powder-coated steel
Fixings: Stainless steel screws or screws with plastic caps; no sharp edges or finger traps
Foundations: Anchored on a flat surface, 0.6–0.8 m deep; installs in about 1 hour

With a free-fall height under 0.6 m, BS EN 1176-1 allows this springer on grass or turf, or on any EN 1177 impact-absorbing surface. We'll recommend the right finish for your site.

How to Use

Spring rocker

The child sits astride the log, holds the stainless hoop handle and rocks forwards, backwards and side to side on the spring.

Benefits:

Rocking builds balance, core strength and coordination; the low seat and firm handhold give young children and those who need more support an easy, confident ride.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check the spring, handle and fixings are tight and undamaged and that the ground around the spring base stays level. Replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A natural Robinia log on a single steel spring, with a stainless hoop handle to hold. It is low, simple and easy to get on, so it suits children from age 1 and those who need a little more support.

- Low seat, handhold and easy access, from age 1
- Free-fall height under 0.6 m, so it can go on grass
- Stainless handle, powder-coated steel spring and galvanised fittings for long outdoor service
- Certified to BS EN 1176-1:2017+A1:2023; installs in about an hour
- Designed, supplied and installed by Morti Sport & Play's own teams
