# Robinia Deck Roundabout with Seats

## Materials & Construction

| |
|---|
| **Frame & turntable:** Hot-dip galvanised and powder-coated steel, with stainless steel parts; anchored 0.6–0.8 m into the ground |
| **Deck:** Robinia timber boards, 0.12 m above the ground |
| **Seats & backrests:** HPL panels, with steel handrails |
| **Fixings:** Stainless steel screws or screws with plastic caps |

**Free-fall height is 1.0 m, so BS EN 1176-1 allows turf or topsoil under it. Bark, woodchip, sand or an attested synthetic surface such as wetpour can be used instead. We quote surfacing alongside the equipment.**

*Images are computer visualisations; the installed product will look similar. Colours may vary from those shown.*

## How to Use

### Roundabout

Up to eight children sit on the two seats or stand on the low timber deck holding the handrails, while others push and run alongside. The deck sits just 0.12 m above the ground, so it is easy to step on and off.

**Benefits:**

Builds balance and coordination, gives the spinning sensation children seek, and encourages turn-taking.

## Inspection & Maintenance

Routine visual check weekly (daily on busy sites), an operational check every 1–3 months and a main inspection once a year. Check the bearing for smooth running and play, the deck boards and seats for damage, and the handrails and fixings for wear. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

## Why Choose This Product

A compact roundabout with a natural Robinia deck that fits small sites and can go on grass, giving up to eight children spinning play from age 3.

- Free-fall height of 1.0 m, so it can go on grass
- Low 0.12 m deck that is easy to step on and off
- Installs in about 1.5 hours
- Designed, supplied and installed by Morti Sport & Play's own teams
