Hanging Rope Traverse

Materials & Construction

Frame:	100 × 100 mm steel posts, hot-dip galvanised and powder-coated (or powder-galvanised and powder-coated)
Ropes:	Steel-core ropes in polypropylene braid: low rope walkway and hanging hand ropes, with plastic, stainless steel or aluminium connectors
Chains:	Calibrated stainless steel chains to prevent finger entrapment
Fixings:	Stainless steel screws or screws under plastic caps; polypropylene end caps

Free-fall height is 1.00 m, so BS EN 1176-1 allows grass or turf as well as EN 1177 impact-absorbing surfacing. We'll recommend the right finish for your site.

How to Use

Crossing the traverse

Children shuffle along the low rope walkway, moving hand to hand along the hanging ropes.

Benefits:

Builds balance, grip and core strength.

In a trim trail

Pair it with bridges, nets or balance beams to build a longer circuit.

Benefits:

Adds variety and keeps groups moving.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check rope tension, connectors and fixings, and keep loose-fill surfacing topped up. Replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A low rope traverse on angled steel posts. Children cross a rope walkway while holding a row of hanging ropes, a balance challenge with a free-fall height of just 1.0 m.

- Free-fall height of 1.0 m — grass or turf allowed under BS EN 1176-1
- Compact 3.36 m span that slots into any trim trail layout
- Certified to BS EN 1176-1; ages 4–14, up to 4 users
- Designed, supplied and installed by Morti Sport & Play's own teams
