# Multi-Level Pyramid Rope Climbing Net

## Materials & Construction

| |
|---|
| **Mast:** Galvanised and powder-coated, or hot-dip galvanised, steel |
| **Net:** Steel-core ropes in polypropylene braid |
| **Connectors:** Durable plastic, stainless steel or aluminium |
| **Fixings:** Stainless steel screws and/or screws under plastic caps |

**Free-fall height is 1.0 m, so BS EN 1176-1 allows grass or turf as well as EN 1177 impact-absorbing surfacing. We'll recommend the right finish for your site.**

*Images are computer visualisations; the installed product will look similar. Colours may vary from those shown.*

## How to Use

### Climbing the net

Children climb the outer net towards the mast, choosing their own route and height.

**Benefits:**

Builds grip, upper-body strength and confidence at height.

### Internal net levels

Two internal net levels let children rest, cross the pyramid and climb on.

**Benefits:**

Encourages balance, route planning and group play.

## Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check rope tension, connectors and fixings, and keep loose-fill surfacing topped up. Replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

## Why Choose This Product

A 4.5 m pyramid net built around a central steel mast, with two internal net levels. Up to 48 children can climb at once, and the free-fall height of just 1.0 m keeps surfacing options open, including grass.

- High play value: 48 users on one 7.00 x 7.00 m structure
- Free-fall height of 1.0 m — grass or turf allowed under BS EN 1176-1
- Steel mast with steel-core rope net built for high-footfall parks and schools
- Designed, supplied and installed by Morti Sport & Play's own teams
