Robinia Five-Seat Group Swing

Materials & Construction

Posts: Robinia hardwood posts set 0.9 m into the ground in concrete
Top beams: Steel tube beams joining the posts into a five-sided frame
Swings: Five flat seats on chains with shackles and swing hangers
Fixings: Threaded rods with welded bolts, washers and plastic caps

With a free-fall height of 1.5 m, impact-absorbing surfacing to EN 1177 is required under each swing's path (loose fill at least 300 mm deep). We'll recommend the right finish for your site.

Images are computer visualisations; the installed product will look similar. Colours may vary from those shown.

How to Use

Group swing

Five children swing at once, one on each side of the frame, facing outwards, so friends can swing side by side.

Benefits:

Builds balance, core strength and rhythm, and makes swinging a shared, social activity.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check ropes, chains, seats and swing hangers for wear, fixings for tightness and timber for splits around fixings. Replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A five-seat group swing with Robinia posts and steel top beams. Five swings on one frame take up less space than separate swing sets and let a group swing together, which suits busy school playgrounds and parks.

- Five swings on one frame, from age 3
- Robinia posts with strong steel top beams
- Less space than separate swing sets for the same number of seats
- Designed, supplied and installed by Morti Sport & Play's own teams
