Stainless Steel Climbing Circuit

Materials & Construction

Structure: Stainless steel, built for weather and intensive use; posts finished with ball tops

Hanging elements: HDPE rings and stepping discs on chains

Climbing wall: HDPE panel with handholds

With a free-fall height of 2.00 m, impact-absorbing surfacing to EN 1177 is required across the whole safety zone — for example wetpour or bonded rubber mulch tested to this height, or loose-fill at 300 mm depth. We'll recommend the right finish for your site.

How to Use

Ladders & net chimney

Children climb the five shaped ladders and the vertical net chimney between the two linked frames.

Benefits:

Builds upper-body strength, grip and coordination.

Hanging rings & stepping discs

Children cross the bridge of suspended discs and climb through the four hanging rings.

Benefits:

Develops balance, core strength and confidence.

Inspection & Maintenance

Routine visual check weekly (daily on busy or vandal-prone sites), an operational check every 1–3 months and a main inspection once a year. Check fixings, chains, nets and moving parts at each operational check, and replace worn or damaged parts promptly with genuine spares. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A stainless steel climbing circuit designed like an outdoor fitness frame, giving older children and teenagers a varied route of ladders, a net chimney, a climbing wall and hanging rings.

- Stainless steel frame for intensive use in all weathers
- Six different climbing and hanging challenges in one unit
- Certified to BS EN 1176
- Designed, supplied and installed by Morti Sport & Play's own teams
