Robinia Spider-Web Climbing Net Frame

Materials & Construction

Frame: Robinia posts and log beam, set in the ground in concrete (0.15 cubic metres in total)

Net: Inclined spider-web rope net with knotted ropes

Largest part: Robinia log, Ø14/16 x 330 cm; heaviest part 65 kg

Installation: About 10 hours for two installers

Free-fall height is 2.2 m, so the safety zone needs impact-absorbing surfacing to EN 1177, e.g. 400 mm of loose fill or tested synthetic surfacing.

Images are computer visualisations; the installed product will look similar. Colours may vary from those shown.

How to Use

Spider-web net

Children climb the inclined spider-web net up to the Robinia beam, switching between the web and the knotted ropes, and work out how to pass each other at the top.

Benefits:

Builds motor skills, coordination, balance and judging distance, and encourages cooperation.

Inspection & Maintenance

Routine visual check weekly (daily on busy sites), an operational check every 1–3 months and a main inspection once a year. Check the net, rope connections and ground anchors for wear, the beam fixings for tightness, and the surfacing depth. Morti Sport & Play offers annual inspection and maintenance for school and public sites.

Why Choose This Product

A striking spider-web climb on a simple Robinia A-frame, for schools, parks and natural play areas.

- Inclined net suits a range of abilities
- Up to five children climb at once
- Natural Robinia frame
- Designed, supplied and installed by Morti Sport & Play's own teams
