

GCB MEDICAL SUPPLY

2025 PRODUCT CATALOG

Our Story

The miraculous survival of our namesake, Georgia Claire Bowen, sparked the creation of GCB Medical Supply.

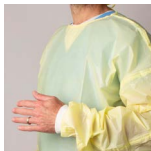

In 2018, Georgia, the fourth child of Founder and CEO, Kate Bowen, was born unexpectedly in cardiac arrest. Through her daughter's heart transplant journey and with her professional expertise in the medical device and clothing design fields, Kate developed The Georgie, a first-of-its-kind pediatric gown that allows for seamless medical assessment and monitoring, and for parents to easily connect with their babies.

GCB is on a mission to help make heart transplant a cure and not just a gift of time by funding groundbreaking research for heart transplant recipients. **Since 2020, GCB has donated over \$1.2 million to advance this critical research.**

Chemotherapy Rated

GCB Medical Chemotherapy gowns meet (AAMI) specifications for fluid resistance. Our chemo-rated isolation gowns have a fluid-impervious coating providing barrier protection against exposure to blood, bodily fluids, chemicals, and other infectious substances. Tested against the top chemotherapy drugs, with added comfort from a breathable material.

Moderate risk. Has been evaluated for resistance to permeation of chemotherapy drugs. (see chart below for more details)

A pair of hands wearing blue nitrile gloves is shown holding and inspecting a clear plastic medical device. The device has a cylindrical body with a flange at one end and a small, clear, bulbous component at the other. The hands are positioned to examine the device from different angles, highlighting its transparency and structural details. The background is a solid, bright white, providing a clean and clinical setting for the inspection.

Pediatrics

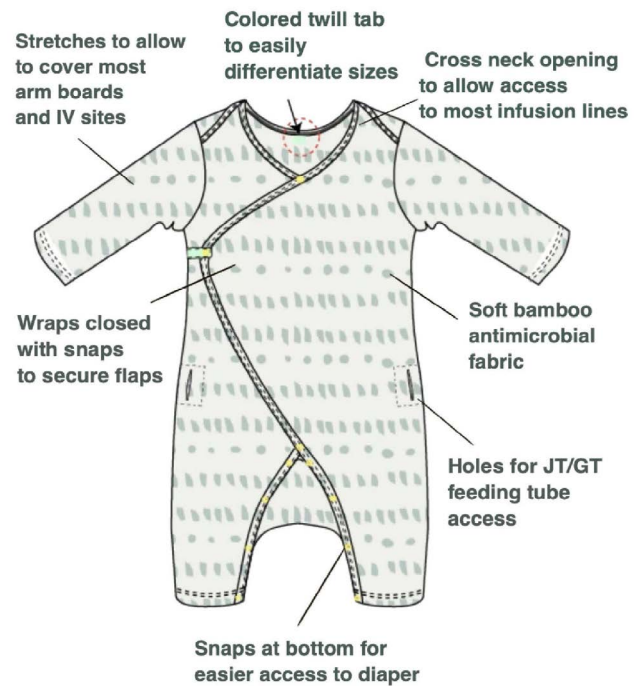

The Georgie – Pediatric Patient Gown

The Georgie is an innovative take on a traditional hospital Gown. It was designed by our Founder and CEO, Kate Bowen, in collaboration with the clinical and supply chain teams at Boston Children's Hospital. The Georgie acts as a wearable securement garment for peripheral components of clinical care, while providing comfort to patients and families. Made of ultra-soft breathable fabric and color-coded by size, the Georgie will enhance patient satisfaction and operational efficiencies.

Features and Benefits

- Design allows for easier access to move IV lines, feeding tubes, VADs and more
- Wide arm and leg circumference can accommodate most IV site protector cuffs and help with dressing and undressing patient
- Can improve patient and family involvement by allowing for parent participation in daily care-taking, like dressing their child
- Can be used with sleep sacks to promote safe sleep with infants
- MRI and CT compatible
