

# ELECTRONIC INCLINOMETER

**With all the Functions Required by the Imo, supports Decision-Making on Board to Prevent Dangerous Situations**

Our Electronic Inclinometer is a precise and compact three-axis motion measuring device, which sustainably increases the safety of crew and cargo through its warning function – and all this at the best price/performance ratio on the market.

Improves safety for passengers and crews and is intended to support the decision-making process on board (especially when connected to the VDR) in order to:

- Avoid dangerous situations (change course or route)
- Assist in maritime casualty investigations (submit down load of motion data log, warning lists...)

## KEY FEATURES
