

FLEET CONNECT

We Provide Shipping Companies with High Quality Data for Their Requirements in the Areas Of Safety, Compliance, Planning and Optimization

The validation of a large number of the ship's operational and nautical measurement values onshore for measurement optimization – this is the key demand of today's maritime data acquisition.

The major challenge for vessel owners and operators to verify and validate the large amount of data after receiving them on shore still increases. Unclean data can significantly lower the potential for optimization and might even lead to disadvantages in vessel operation.

THE DATA SUPPLIER

DATA BUTLER — PROVISION OF EXCELLENT SHIP DATA

The DATA BUTLER is a cloud based service to provide ship/fleet data to the customer via standard interface for further processing. Different service levels are available, from high resolution data provision on demand up to full data quality information.

THE DATA VERIFIER

DATA INSPECTOR — ENSURE DATA QUALITY

The DATA INSPECTOR is an additional service to the DATA BUTLER or available as a stand-alone service. It contains daily data checks, fleet data quality reports and trouble shooting measures and thus provides the data basis for optimized fleet planning and vessel operation.

KEY FEATURES

- Provision of ship data with easy access
- Full system responsibility
- Unlimited cloud based data storage – with 24/7 access
- Focus on cyber security – encrypted ship-to-shore data transfer
- Remote service, updates and customer specific configuration

KEY FEATURES

- Ensured data quality as a precondition for compliance, planning and optimization
- Continuous system health check and daily data evaluation by qualified service technicians, analysts and marine engineers
- Fleet data transparency by automatic reports, including system health, quality KPIs
- In-depth evaluation of primary signals to detect implausibilities, drifts and offset
- Fast response – (remote) service attendance reduces downtime to a minimum

OUR PRODUCT RANGE

CONTROL SYSTEM

- Valve Remote Control
- Anti-Heeling
- FLUME Box Tank — Roll Damping
- INTERING U-Tank — Roll Damping
- Dock Control
- Floating Condition Control

MEASURING SOLUTIONS

- Tank Content Measurement
- Bunker Management
- Draught Measurement
- Dynamic Draught and Floating Monitoring
- Maihak Shaft Power Meter
- Maihak SHaPoLi
- Fuel Consumption Measurement
- Energy Measurement
- Electronic Inclinometer

INFORMATION SERVICES

- Performance Monitoring
- Crew Connect
- Fleet Connect

FLEET SERVICES

- Technical Support
- Spare Parts
- Service On Board
- Retrofit
