

## Product & Release Notes - Maihak Shapoli 1.09, April 2026

MAIHAK SHaPoLi Release introduces the implementation of new MEPC.390(81) requirements, usability improvements, and an updated software installation procedure.

### Release Overview

- Optional software upgrade available for MAIHAK SHaPoLi Release 1.09.
- Upgrade includes new features, bug fixes, and minor improvements to improve system performance and reliability.
- A new "GET LOG" function allows SHaPoLi log files to be downloaded directly to an empty USB drive.
- The log export process takes only a few seconds and follows on-screen instructions.
- General usability improvements.

### New Exceedance Features

- Implementation of requirements from MEPC.390(81).
- Introduction of a 5-minute delay for the power exceedance alarm.
- Addition of a countdown timer on the main page showing when the power exceedance alarm will activate.
- During the countdown, no power exceedance alarm is recorded.
- If the power remains above the limit for 5 minutes, the power exceedance alarm is activated and must be acknowledged with the captain's PIN.
- The timer resets automatically when power drops below the threshold.
